C. A. Conrad President Brentwood Trade Board

Full Attendance at Election Meeting;
W. O. Wallace, Retiring Pres., Honored

One of the largest meetings in the history of the Brentwood Board of Trade saw C. A. Conrad elected president and Fred Riley, vice-president, at the W.I. Hall on Monday evening in Brentwood. The full slate is as follows: Honorary president, J. E. Sladen; president, C. A. Conrad; vice-president, Fred Riley; secretary-treasurer, Prescott Moody; auditor, W. Bullock. Executive council: W. Kersey, W. O. Wallace, A. G. Lambbrick, Frank Spooner, Hugh Francis, P. Holloway, Capt. Nat Gray, A. G. Smith, L. Hafer, Claude Butler.

J. V. Johnson, president of the Associated Boards of Trade of Vancouver Island and Major Cuthbert Holmes, president of the Victoria Chamber of Commerce, installed the officers.

In his remarks before retiring from the chair Mr. Wallace reviewed briefly the work done by the board in the past year.

The bus shelter on East Saanich Road was sponsored by the Board. The Brentwood water scheme, which is now under consideration, was another project. Mr. Wallace expected that in the near future water would be available in Brentwood.

The Mill Bay Ferry, now in operation after some months of no ferry, was also sponsored by the Brentwood Board in conjunction with other interested organizations. The road from Benvenuto Avenue to the West Saanich Road south of Heals was opened and also sponsored by the Board.

Conversion of the B.C. Electric plant at Brentwood to oil firing has relieved the area of much smoke and dust nuisance, this endeavor was also suggested by the Board.

At the conclusion of his speech Mr. Wallace was the recipient of a presentation of a pen and pencil desk set. In making the presentation, Capt. Nat Gray, oldest active member of the Board, told of the many happy times he had enjoyed with Mr. Wallace. "We haven't always agreed," he said, "but much work had been accomplished."

He told of the fine spirit always shown by the retiring president, of his integrity and "stick-to-it-ness." In addition to the gift, the meeting unanimously voted Mr. Wallace an honorary life member of the organization.

W. Kersey, also suggested to the Board that it be suggested by them to the Saanich Council that the recently graded road, now unnamed, which runs down what was the old Interurban track, and now a fine highway, be named the Wallace Highway. The matter will be taken up at a later meeting.

In thanking the members for their gift Mr. Wallace told many interesting anecdotes of the early (Continued on Page Five)

Water Fathers Vexed Main Valve Closed

After a hard year of work, and just before the annual meeting, the Water Board of the Sidney Water District were mystified when they received complaints on Sunday that water was off in certain sections of the district.

Dressed in his Sunday best the foreman was hastily summoned. He donned his overalls and started the search for the trouble. The main lines had been checked. There had been no warning. It must be a major break, meaning a long and tedious repair job. He checked and checked, main after main. Finally the trouble was found. A resident, for some reason, had turned off the valve in the main line. There was no break, a simple matter to turn the valve and the problem was solved.

Needless to say, the Water Fathers were annoyed, so was the foreman.

DITCHING WORK WELL IN HAND

The work of filling in the drainage ditch in downtown Sidney streets is continuing. It is expected that the work will be completed early next week. The soft fill is being removed and gravel placed on the top three feet. This will make the streets accessible for traffic. It will enable heavy traffic to again use Third Street, which was heavily surfaced only last year, and will lessen the strain on side roads which are now breaking down due to excessive traffic.

EXPECT HIGH DEMAND

Chief reasons behind the expected high demand for farm products throughout 1946 are the larger volume required for export and relief, and the expected high level of civilian purchasing power.

Lines Written in Early Spring

I heard a thousand blended notes,
While in a grove I sat reclined,
In that sweet mood when pleasant
thoughts
Bring sad thoughts to the mind.

To her fair works did Nature link
The human soul that through me
ran;
And much it grieved my heart to
think
What man has made of man.

Through primrose tufts, in that
sweet bower,
The periwinkle trailed its wreaths;
And 'tis my faith that every
flower
Enjoys the air it breathes.

The birds around me hopped and
played,
Their thoughts I cannot measure:
But the least motion which they
made,
It seemed a thrill of pleasure.

The budding twigs spread out
their fan,
To catch the breezy air;
And I must think, do all I can,
That there was pleasure there.

If this belief from heaven be sent,
If such be Nature's holy plan,
Have I not reason to lament
What man has made of man?

—William Wordsworth.

A Sight Soon To Be Seen

A field of the beautiful Dogtooth Violets. This delightful study of Erythronium brings vividly to mind the first days of spring on the Peninsula and the Gulf Islands. Similar sights are then common. One of the treats for those who visit here in the spring are these lovely flowers, starlike of pristine whiteness, with their mottled green foliage.

CLOSED SEASON PROPOSED FOR BEAM TRAWLERS

The following Gulf of Georgia areas may be closed to beam trawlers if proposals now before the supervisor of fisheries are approved:

The northern part of the gulf, north of a line between Shelter Point and Lund; the area included within boundaries formed by joining Maplegrove Point (Vancouver Island), Dadds Narrows, Entrance Island, Point Young, Lasqueti Island, Harness Island, Grief Point and Cape Lazo, including Baynes Sound.

Trincomalli Channel at Portler Pass, from Single Point, Rose Inlet, Hall Island and Salsbery Bay; Sansum Narrows from Grave Point; Satellite Channel, through to Piers Island and Eleanor Point, and the entrance to Burrard Inlet, inside a line from Point Atkinson to bell buoy and Point Grey.

In addition, it is proposed that the area south of Dadds Narrows, to Yellow Point and Miami Islet, be closed annually on Dec. 20 to give lemon soles an opportunity to spawn in that region.

The brief proposes that "well recognized habitat grounds on the west coast" be closed to beam trawling during the season when halibut are to be found on them in large numbers. Three such areas on the west coast of Vancouver Island are designated.

No such regulation should be placed upon Canada in vessels unless similar limitations are enforced upon U.S. vessels, Mr. Hart states.

Patricia Bay Officer Tells of Air Benefits

Speaking to the Gyro Club in Victoria this week, Pte.-Lt. L. H. Kelsey, of the Patricia Bay air base, told of the many advantages to be obtained from permanent employment with the R.C.A.F.

Pte.-Lt. Kelsey said the aim of the interim air force was a strength of 16,100. Patricia Bay, said the speaker, would be the main air base of the Pacific Coast.

Conditions of service with the permanent force would be announced before March 31. "It is understood that they will compare favorably with private industry," he said. Advantages of such service were pointed out by the air officer. With remuneration as high and sometimes higher than private industry and augmented by a pension after 20 years of service, the Air Force as a career will appeal to many young men. Age limit for enlistment is between 18 and 25, with the exception of ex-servicemen, who may be 25, plus their years of service.

Millions Must Be Spent To Enlarge Airport In England

Millions of pounds must be spent, more than 30 houses torn down and a road diverted so that the latest and largest of British air liners can leave the ground. The new plane is called the Brabazon.

Breaks Collarbone In School Gymnasium

Jim Dignan, son of Mr. and Mrs. W. J. Dignan, suffered a broken collarbone at the High school gymnasium on Monday afternoon. The class was in the midst of a regular period of athletic training when the accident occurred. The lad was taken to Rest Haven hospital where Dr. G. H. Hoehn set the broken bone. Jim will return to school today (Wednesday).

THE WEATHER

The following is the meteorological record for week ending Mar. 3, furnished by Dominion Experimental Station:

Maximum temperature	50
Minimum temperature	34
Minimum on the grass	32
Rainfall (inches)	2.61
Sunshine (hours)	19.5

SYNOPSIS FOR FEBRUARY

February, 1946, was characterized by mild showery weather with less than average sunshine. The mean temperature was 40.6 degrees as compared to the long-term average of 38.2 degrees. The highest temperature occurred on the 24th, 51.5 degrees, and the lowest 30 degrees on each of the following dates, the 3rd, 4th, 10th and 11th. The minimum on the grass was 26 degrees.

The highest February temperature recorded at this station during the past 33 years was 59 degrees on the 28th, 1924, and the lowest, 19 degrees on the 7th, 1936. Another low recording was 11 degrees above zero on the 13th and 14th of February, 1923.

The total precipitation amounted to 4.55 inches, 25 inch of which was contributed by the 2.50 inches of snow which fell on the 2nd of the month. It was the wettest February since 1937 when 5.65 inches was recorded. The highest total precipitation occurred in 1930, 6.49 inch, and the inch of snow fell in February, 1916. This was preceded by 30.10 inches in January of the same year.

The total hours of bright sunshine was 67.4, 25 hours below the average and the lowest since 1926.

LOCAL POLICE COMMENDED BY COMMISSIONER

In his report on the activities of the B.C. Police, Commissioner T. W. S. Parsons mentioned the work of Constable J. Gibault at Sidney to aid community efforts in boys' and girls' work. The commissioner noted that beside giving talks to schools, Constable Gibault had guided a boys' executive and a boys' club had been organized by a former constable. At Gonzaga Skipper E. Lockwood and Constable A. J. Dillabough had given the usual talks to schools in the area, assisted in a Hallows' party and aided weekly meetings of Boy Scouts and similar organizations, as well as promoting several outdoor sports. The report of the commissioner was made last week to the Provincial government.

Sidney Water District Shows Profit First Year

More Than \$6,000, Less Office Expense,
Cleared in First Year; F. F. Forneri and
A. Gardner Elected to Boas.

A crowded room at the Sidney school testified to the interest shown in the annual meeting of the Sidney Water District Board of Trustees held on Wednesday evening. J. Tindell acted as chairman of the meeting.

In his report on finances, Chas. M. Lang, treasurer, read the detailed financial statement which had been audited by Geo. A. Touche & Co., of Victoria.

PROFIT SHOWN

A profit of \$6,051.88 was shown for the first year's operation. It was later established that certain office expense should be deducted from this total for the clear profit.

In a discussion on the financial statement it was suggested from the floor that due to the difficulty of "taking in" the financial report when read, that it be published before future meetings. Later this question was put to the meeting and a unanimous approval given the motion.

H. J. McIntyre, chairman of the Board then gave his report.

Mr. McIntyre told of the complete history of the Board since purchase of the system on May 1, 1945. A full report of Mr. McIntyre's speech will be found elsewhere in this issue.

In the discussion which followed, a motion was put with reference to Elk Lake water. The motion asked that the Board not use Elk Lake water but use only spring water in the system. In a debate on the motion it was allowed that such action would definitely tie the hands of the trustees in an unwise manner, the mover then agreed to withdraw the motion.

NEW TRUSTEES

Before proceeding with questions J. Tindell then called for nominations for trustees to succeed Trustees Gray and Lang, both of whom were unable to run again.

F. F. Forneri and A. Gardner received unopposed nomination and were elected by acclamation. A unanimous vote of thanks was accorded the retiring trustees in particular and the whole board for their untiring efforts in behalf of the community, and the splendid report they had submitted.

TAXES DISCUSSED

In the question period which followed a strong protest was made against the personal property assessment levied. This tax, it was pointed out, was levied against only a few and was therefore unfair in that either all or none should have this special tax. Mr. McIntyre stated that in the first eight months of operation of the Board every effort had been made to raise money. The tax had been considered, he said, and he was sure the Board would consider well the requests of the meeting.

After more discussion a motion was put to the meeting asking the Board to consider taking off the Personal Property Tax entirely. The motion carried. Mr. McIntyre stated that the hint would be taken.

The actual framing of the motion was the cause of some debate. It was felt that to definitely ask the Board to remove the tax would again unfairly commit that body to a course of action which they had undoubtedly investigated. By framing the motion in the manner put to the meeting, that the Board "consider" the removal of the tax, it would not define too positively the actions to be taken by the Board.

Asked if the Trustees had given thought to expansion, Mr. McIntyre stated that while the first consideration must be given to the improvement and maintenance of the existing district, future expansion of the system had been discussed. "At the moment," said the chairman of the Board, "we are taking the stand that all applications will be considered."

In answer to another question Mr. McIntyre stated that the only commercial rates were to hospitals and dairy farmers. Dairy farmers were defined as those having 10 milking cows.

The full Board of Trustees is now as follows: Hugh J. McIntyre, chairman; W. Oliver, Everett Goddard, A. Gardner, and F. F. Forneri.

FERTILIZER SALES

In the 12 months ended June 30, 1945, the sales of fertilizer material and mixed fertilizers in Canada totaled 1,092,388 short tons, according to a preliminary estimate. For the previous year the sales were reported at 1,052,231 short tons. Sales of cyanamide are not included.

FULL TEXT OF HUGH J. McINTYRE'S ADDRESS AT THE ANNUAL MEETING OF THE SIDNEY WATER DISTRICT

Your trustees are pleased to report a very successful eight months' operation in 1945.

We took over the system from the Sidney Water & Power Co. Ltd. on May 1, 1945, paying \$27,500 for same. The district was very fortunate in having a local citizen loan us \$28,000 at four percent interest to allow the purchase to be made.

NEGOTIATED 14 MONTHS

You will recall that previous to May 1, 1945, we spent some 14 months in negotiations before we could arrive at the figure of \$27,500, which we believe was fair to both sides. Altogether your trustees attended approximately 40 meetings and conferences before the deal was concluded.

Again we were very fortunate in selling \$36,000 worth of debentures direct to local citizens. These are serial debentures in \$500 denominations, interest at four per cent, and spread over 20 years, \$1,500 to be retired annually for the first eight years and \$2,000 annually for the following 12 years. We have the privilege of retiring additional debentures each year, if finances permit and it is deemed advisable.

With the \$36,000 available we at once paid off the loan of \$28,000 and \$100 legal fees that had accumulated over the 14 months.

We have repaired many leaks in the mains, the most serious being a break on Beacon Avenue that was not found for several days when we lost approximately 1,000,000 gallons. This break was very difficult to find due to heavy rains and the fact that the water did not come to the surface but found its way to an underground drain.

Your trustees are of the opinion that the main on Beacon Avenue from Fifth Street to the sea should be replaced as soon as possible. We have the pipe now on hand and paid for and as soon as the weather improves work

HUGH J. McINTYRE

We have installed a new fire hydrant at the corner of Marine Drive and East Road. This will warrant a reduction in insurance rates for the North Saanich High (Continued on Page Two)

Continued From Page 1.

FULL TEXT OF HUGH J. McINTYRE'S ADDRESS AT THE ANNUAL MEETING OF THE SIDNEY WATER DISTRICT

school and a number of homes near by. The chairman of the School Board has been advised of the installation and will see that the insurance rates on the school and equipment are revised. Ratepayers with homes within 500 feet of this hydrant are also entitled to a reduction in insurance rates.

The complete job, including cost of digging and refilling, pipe, fittings, hydrant, etc., amounted to approximately \$1,600, and is paid for.

On replacements in other parts of the system and 21 new meters and upkeep of car we have spent about \$880.

We have 11 miles of mains, 10 of wood, one of metal.

We have two tanks, built of California Redwood, each with a capacity of 100,000 American gallons. These tanks are situated on the side of the mountain south of McTavish Road, near the junction of Centre Road.

MAINS AND PROPERTY

We have three parcels of land of approximately seven acres each: One where the tanks are located, one to the west of the East Road adjoining the south-east corner of the airport property, and the third to the east of the East Road a few hundred feet across the highway from the west parcel.

On the seven acres west of the East Road are a home for the foreman, in which is installed a telephone, a large storage shed for wooden mains and a place to house the district car. There is also on this property another building that we had Reading Bros. extend. Now all valves, small pipes, fittings, etc., are stored in this building under lock and key. This building also covers one of our wells, which has nine or ten feet of fine sand in it. We might mention that this particular well is said to be one of the first dug in the vicinity and at a depth of approximately 15 or 16 feet a vein of excellent spring water was struck. The volume of water is said to have

rushed in so fast that it rose to the digger's shoulders before he could be pulled out although he had a rope tied around his waist just previous to making the strike as he could hear the water running before he finally broke into the vein. That was over 30 years ago. In the interval this well has been deepened considerably and until the sand is removed it will not be easy to judge the real volume today. It is our intention to have this well cleared of sand by some firm or individual with the necessary equipment to do a good job.

The service car owned by the district was in very poor condition when we took over and although we have had it overhauled and tenderly cared for since it is practically a cripple and will shortly need replacing by something better.

PUMPS

We have a 20-horsepower pump in the pump-house on our property to the east of the East Road. This pump is not in the best of condition, having been in constant use for about 22 years and only being overhauled on occasions when it refused to work. We have just installed a new 15-horsepower pump from Pumps & Power of Vancouver with a capacity of 225,000 gallons per day, which we hope will be in operation shortly, after which the 20-horsepower pump will be taken out and thoroughly overhauled and the wearing parts made to correspond to those of the 15-horse. Upon return of the 20-horsepower pump same will be installed in line with the 15-horse in order that we may have at all times a pump in reserve for instant use should the other fail. This will be a great improvement over the old set-up, where there was no reserve. The network of pipes in this pump-house has been renewed. The installation of this new pump and renewal of pipes in the pump-house cost approximately \$800 and is paid for. The extension to the building west of the East Road cost approximately \$325 and is paid for. The addition of the new pump necessitated a redistribution of the wiring in the pump-house. Since taking over on May 1, 1945, we have pumped 23,125,500 gallons of water, or a daily average of 94,776 gallons, and have been paid for approximately 40,000 gallons per day, thereby losing approximately 55 percent. We are satisfied this is not escaping through leaky mains alone, but unmetered accounts as well. For example: A new meter was placed on an unmetered account and in 40 days this account used 9,400 gallons. So we are looking forward to considerable saving in the amount of water pumped when the 125 meters now on order are installed.

The valves on the main line were in poor working condition. Most of these have been overhauled and new spindles made and fitted where necessary. Several have yet to be overhauled and refitted. A number of new spindles have been made for two-inch valves and fitted, thereby eliminating the necessity of buying new valves. This machine work has been done by one of the trustees without expense to the district.

A study of meters was made and it was found that the Trident, used by the City of Victoria and surrounding municipalities, was very satisfactory. To profit by the experience of others we decided to use Tridents. The working parts of these meters are sealed in a lubricant and this ensures many years of service.

METERS

At present we have approximately 480 consumers, 311 with meters and 169 without. When we took over the system we discovered there were 61 meters not working. We also learned that there were several different makes of meters, a considerable number being obsolete. Twenty-eight one-half inch meters have been repaired, but additional parts are unobtainable. One two-inch meter has been repaired. Quite a few Keystone meters will have to be scrapped. Since taking over we have installed 21 new Trident meters and ordered 125 more.

It might be mentioned that one of the trustees made a special trip

Lyrical

Single, lyrical, and still in her early twenties, attractive Adrienne White supplies a note of beauty as head of the choral group on the Toronto radio show "Voice of Victor."

to Vancouver to negotiate for the wooden pipe, pump, meters, etc., and was able to obtain a saving of one dollar per meter, amounting to the sum of \$125 on the order. This without expense to the district.

Since taking over the system we have made 15 new connections and renewed 20.

WELLS AND SPRINGS

We have three dug wells, one drilled well and up on the mountainside a fine spring. This little spring runs approximately 1,000 gallons per hour during the winter months and flows direct by gravity into our tanks. This enables us to save on electric power during the winter. In the dry season this spring barely keeps running. We intend to study the proposition of increasing the flow of this spring or discovering another source on the mountainside to augment the present flow.

At strategic points we have 14 hydrants, the last installation being at the North Saanich High school. It is interesting to note that when the system was installed hydrants cost \$33, today they cost \$83. Due consideration will be given to installation of additional hydrants.

We now have an Underwood Sunstrand adding machine, medium-size safe, filing cabinets, chairs, etc. A new Underwood typewriter is due to arrive soon. We carry \$500 insurance on the office equipment and \$1,000 burglary insurance on the safe. We keep our very important papers, titles, etc., in a safety deposit box in the Bank of Montreal.

FINANCES

Just a few figures to give you our financial set-up. You will note by the auditors' report that we started 1946 with a credit balance of \$8,000. We estimate receipts for the year 1946 to total approximately \$15,000.

It will be necessary to set aside approximately \$3,000 to take care of maturing debentures and interest, \$1,500 in debentures and \$1,440 in interest. The interest on the debentures works out at \$120 per month.

The 125 new meters will cost approximately \$1,900.

To complete the Beacon Avenue replacement from Fifth Street to the sea will cost approximately another \$500.

Operating expenses, including office and general maintenance, we estimate will cost approximately \$9,000.

Your trustees are giving serious consideration to the matter of replacements and are endeavoring to replace the worst sections of the system first. There is one section of eight-inch main near the tanks that needs replacing. It will be necessary to cut the water off some of our consumers when this is done. Due notice will be given. We have the pipe on hand to do the job.

After completing the Beacon Avenue replacement we intend to renew the four-inch main on Third Street south to Bazan Avenue as we are given to understand that the government intends to pave this block for parking space for buses from sidewalk to sidewalk. The four-inch main from Beacon Avenue north to Roberts Bay is in very poor condition, as well as the three-inch main from Third Street east along Victoria Road to Beaufort Road. These and other sections in need of replacement will have our attention as soon as we can secure the pipe and fittings and finances permit.

EXPANSION

The board of trustees are faced with several requests for extensions of small mains. These extensions will be made where deemed advisable, and where there is no immediate prospect of returns to warrant the installation of these small mains, those desiring to join the system may help matters by paying in full or at least the greater part of the cost of the extension.

WATER SUPPLY

As you know, we applied to the Dominion government to be permitted to hook onto the Elk Lake line that supplies the airport. The authorities did not see fit to allow this connection during the war. Since we have learned that the water in Elk Lake is not of the best. In fact Dr. William Newton of the Pathological Laboratory, Saanichton, who has analyzed eight different samples of this water, states we would be well advised to try and augment the present fine supply of water we are blessed with. This we intend to do by taking the sand out of our well and deepening and enlarging where thought advisable. We have a bid in to War Assets Corporation for the "Grav

Well" formally used by National Defence. This well has evidently been overpumped and the filter bed of gravel that was installed around the well wall is now almost solid with very fine sand and thus stops the flow of water to such an extent that only around 20,000 gallons a day could be pumped, according to a test we made. There is no economical way we know of to remove the sand from the filter bed. It would be much cheaper to dig a new well in the same vicinity.

ASSESSMENT

Your trustees are endeavoring to avoid the necessity of borrowing additional funds and are determined to keep the mill rate down to one mill, with a minimum of one dollar, for 1946. The money collected through taxes and donations is to be applied to the reduction of the debentures.

The total assessment of our waterworks district for 1946 is \$1,400,000 in round figures and this will mean \$1,400 in taxes at one mill.

The 1945 assessment was around \$1,200,000, at one mill this means \$1,200. This assessment is now due and after the end of this month eight percent interest will be added. Up to the present about \$800 in taxes and \$80 in donations have been received. Ratepayers and water users can greatly assist us by paying their taxes and water accounts promptly. We have received many letters with donations and these are greatly appreciated. One absentee owner of a lot in Sidney with a minimum tax of one dollar sent us ten dollars, nine as a donation, and stated he was so impressed with our appeal reading: "We are in the Red," that he was going to endeavor to get the water board of Creston, B.C., of which he is chairman, to adopt the same. A lady in our waterworks district, although not at present reached by our system, very kindly sent \$25 as a donation, for which we say many thanks.

It is hoped that by next fall we can retire at least three \$500 debentures in addition to the schedule of three to come due. Every \$500 debenture retired means a saving of \$20 per year to the district.

Respectfully submitted,

Hugh J. McIntyre, chairman,
Sidney Waterworks District.

More than half a million articles, including hospital supplies, clothing and comforts were made by Red Cross members of work units in B.C. last year.

Visiting Father After Years a Jap Prisoner

John Stanley Partridge, son of the Rev. J. A. Partridge, of Saanichton, is visiting his father after an absence of more than four years.

Stanley Partridge was for three and a half years a prisoner of war of the Japanese at Singapore. He arrived from St. John, Newfoundland, on January 12. Mr. Partridge Jr. plans to leave for Malaya at the end of March.

Hotshots Outpoint K.P. In Fast Female Basketball Game

Starting too late in their scoring to win the game, local girls went down to a graceful defeat on Saturday to the Victoria Hotshots.

At the half time score gave Hotshots 10 and K.P. 4. Final score, after some fine teamwork by the local girls, Hotshots 25, K.P. 21.

Audrey Pearson, of the home team, tallied 8 points, with G. Brown runner-up with 6. Teams were as follows:

Hotshots — V. Bartlett, 4; F. Bartlett, 7; M. Noye, A. Walter, C. Kennedy, 10; J. Kerr, P. Mason, P. Cockburn, 4. Total 25.

K.P.—Audrey Pearson, 8; G. Brown, 6; M. Leslie, K. Alexander, J. Thomas, Agnes Pearson, 1; G. Pearson, 2; P. Levar, 4; N. Deveson, D. Kennedy, O. Cravits. Total 21.

WARN VETERANS AGAINST SHARKS

The Department of Veterans' Affairs again issued a warning this week to all ex-servicemen planning to start their own businesses to consult DVA officials before committing themselves to any expenditures.

Experienced business advisers are located in all DVA rehabilitation centres to counsel veterans wishing to re-establish themselves in this way. Citizens' Rehabilitation committees in most B.C. towns and communities offer the same service. Nineteen Department of Labor veterans' advisers are constantly travelling throughout the province to assist veterans in outlying districts.

DVA quotes one case of a veteran who purchased a rooming house, paying \$1,500 for "good will," who later found his monthly income from rentals amounted to \$171.17, while total monthly overhead was \$171. He had been repeatedly discouraged during purchase negotiations from consulting DVA before committing himself.

Far too many B.C. veterans are applying for their re-establishment credit to help pay for businesses after they have completed deals most unfavorable to themselves. Rumors and advice from uninformed or self-seeking sources are misleading many ex-servicemen who do not seek authoritative counsel until it is too late.

Growing Foundation Stock Seed Of Cabbage

The worth of any packet of garden seed is dependent very largely upon the quality of the stock seed from which it was produced. It follows that to be able to produce a desirable product from that seed, as, for example, high quality cabbage heads true to variety name and of good uniformity, the parent stock must have been carefully bred and tested and maintained at a high level. The processing and maintaining of foundation stock seed of cabbage poses a few problems which the operator must be prepared to face.

On the Pacific coast where the greatest part of the cabbage seed produced in Canada is grown, the most common practice is to overwinter the plants in the field, thus saving the labor required in lifting and pitting, with subsequent replanting in the spring. When overwintering in the field it is usually more advantageous to avoid the formation of firm heads, or else rotting is liable to occur with consequent plant loss. By adjusting the sowing time, plants may be obtained which will be sufficiently advanced to bolt readily in the spring but not so big that they form hard heads in late fall. While these conditions are desirable for the commercial seed grower, they are unsatisfactory for the stock seed grower, for unless he can obtain well-grown heads, he cannot evaluate the stock and eliminate the undesirable types. Moreover, the heads should form at the normal time of year for the variety, as head shape tends to vary with the season. Having made his selections, his next concern is to produce seed from the plants selected. For early varieties, this involves much earlier sowing than would normally be the case for commercial seed production, as selection should be done in the summer rather than in the late fall when maincrop varieties are in head. In order to maintain these plants for this extra period the grower must resort to special practices.

A method used at the Dominion Experimental Station, Saanichton, B.C., is to cut the heads of selected plants, leaving the

stump in position. Lateral heads will develop from the stumps, and, if they become firm, are also removed. If this is done before the advent of cold wet weather the cut surfaces callus readily, and the plant overwinters satisfactorily to produce seed the following season.

When seed is in short supply, it may be worth while to increase it by obtaining extra plants from

the heads. This is done by trimming down the sides of the heads with a knife leaving a cylindrical core, and rooting these cores in a cutting bench. They are then moved into pots or flats until well established, and then transplanted in the fall to the seed plot. The small lateral heads will not require trimming but may be formed too late in the season to produce plants which will become established in the field before winter.

Every fourth person in British Columbia was a Red Cross member in 1945. Membership for Canada is one in every six.

COMPLETE HOUSE FURNISHERS

Micrometer Aids Sightless Skilled Men

One of Britain's latest inventions is a Braille reading micrometer for the rehabilitation of blinded ex-servicemen in certain industries. It was shown at the Gauge and Tool Makers' Exhibition held recently in London. This micrometer has been made by a Sheffield firm who were asked by Britain's National Institute for the Blind to apply Braille to a micrometer and thus enable those blinded men, who before World War II, had been skilled tool and instrument makers, to carry on with their normal work. Two designs were produced; they were used by blind craftsmen who offered suggestions which led to improvements. The instrument is based on the ordinary micrometer but the Braille characters on relatively large drums and by revolving these drums the blind men can "take his readings." The model shown is an English reading micrometer but the same principle can be applied to a metric reading micrometer. The system of gearing and drums, too, can be fitted as a standard attachment to any micrometer or micrometer head.

VEGETABLES

It all depends on you! Do those you cook for really enjoy their vegetables, or are they eaten only from a sense of duty?

No vegetable need be flat, colorless and wishy-washy. First plan to serve those that harmonize in flavor and give color contrast, then cook them to retain all their eye and appetite appeal.

Vegetables should be added to boiling salted water—1 teaspoon salt to 1 quart water—rather than pouring the water over them in a cold utensil. Bring the water back to boiling point as quickly as possible, and keep it at that temperature throughout the cooking period. When vegetables are tender, drain and serve immediately, since standing in hot water or over steam is as disastrous as long cooking.

To retain a good color when cooking red cabbage or beets, add a little vinegar to the water. Strange as it may seem, when onions are overcooked they lose their pungent flavor and become tasteless. Large onions will cook more quickly if lengthwise cuts, about an inch long, are made at one end through the centre.

The home economists of the Consumer Section, Dominion Department of Agriculture suggest spiced onions as an acceptable variation or the following recipe for Turnip Souffle. This is a new and exceedingly attractive way to dress up an old-winter-favorite as a supper or luncheon dish.

SPICED ONIONS

6 medium-sized onions
1 tablespoon mild-flavored fat
2 tablespoons brown sugar
¼ teaspoon cinnamon

Hollow out top of onions slightly. Cook in boiling salted water until tender. Blend together the mild-flavored fat, brown sugar and cinnamon. Place a small portion of this mixture in the hollow of each onion. Garnish with a thin wedge of cucumber pickle. Six servings.

CONCORDIA CARROTS

6 medium carrots
2 tablespoons mild-flavored fat
2 tablespoons flour
½ teaspoon salt
¼ teaspoon pepper
¼ teaspoon mustard
¼ teaspoon curry (optional)
1½ cups milk

Wash, scrape and slice carrots in rings. Cook in small amount of boiling salted water until tender. Meanwhile, make a cream sauce by blending fat, flour, salt, pepper, mustard and curry. Add

milk and cook over low heat, stirring constantly until thickened. Drain carrots well, turn into serving dish and pour the sauce over them. Six servings.

TURNIP SOUFFLE

2 tablespoons mild-flavored fat
3 tablespoons flour
1 cup milk
1 teaspoon salt
3 egg yolks
1½ cups finely mashed turnips
3 egg whites

Melt fat, add flour and blend well. Add milk and salt. Cook over low heat stirring constantly until thickened. To slightly beaten egg yolks, add a small portion of the hot mixture. Stir well, add to first mixture and cook 2 to 3 minutes longer over low heat, stirring constantly. Remove from heat and add mashed turnip. Cool mixture. Beat egg whites until stiff, but not dry, and fold into cooled mixture. Turn into a greased casserole and oven-pouch in a moderate oven, 350°F., for 1 to 1½ hours. Six servings.

OF TELEPHONES AND SOCKS

Whether you're looking for new telephone service or a pair of socks, a point to remember is that the problem of shortages is not peculiar to any one business or commodity. The situation is general.

ROSS M. HANBURY

Opening of Victoria offices on the second floor of the Arcade Building was announced today by Wood, Gundy Company Limited, nationally-known investment dealers of Canada.

Coinciding with the announcement was the appointment of Ross M. Hanbury, Vancouver, as local representative of the firm and manager of the Victoria office.

Mr. Hanbury recently returned to the company after more than five years' service with the Royal Canadian Navy.

His appointment in Victoria marked his return to this city after receiving his schooling here at Brentwood College. From the college he attended the University of British Columbia, joining the firm in 1933, in the Vancouver office.

THE GIRL WITH THE LOVELIEST LEGS AT REX

Betty Grable, hailed as the Girl With the Loveliest Legs, appears with Dick Haymes in what is described as one of the most sensational musical films to come from Hollywood. The play, titled "Diamond Horseshoe," opens at the Rex in Sidney on Thursday. Filmed in color, the play has a setting revolving around one of the world's most famous restaurants, "Billy Rose's Diamond Horseshoe." It is a musical with many dazzling sets.

On Tuesday and Wednesday next, Fredric March and Betty Field come to the local screen in "Tomorrow the World," a second feature. "Tanks a Million" rounds out a full program.

SCOUTS AND CUBS

The Sidney "C" Pack met on Monday under Akela Mrs. Dalton. Sixer Ronald Fisher lead the opening Grand Howl and Art Fido the closing Howl. There were good games and star instruction and the meeting closed with prayers.

Over 350 Ottawa Boy Scouts are taking part in the Scout-sponsored sports program which includes skiing, swimming, boxing and wrestling.

CAMPING INCREASES
Nearly 15,200 Canadian Boy Scouts attended 524 Scout camps last season according to the annual Scout census. This compared with 457 camps the year before, an increase of 67 camps, and 12,709 campers the previous year, or an increase of 2,462.

ANOTHER SCOUT V.C.
Major John Foote, Presbyterian padre, who was recently awarded the Victoria Cross is the third former Canadian Boy Scout to win this distinction. Major Foote was a Scout in Madoc, Ont., as a boy. Other Scouts to win the V.C. were Lt.-Col. C. C. Merritt, of Vancouver, and Major John Ferguson Hoey, of Duncan, B.C. In all 21 former Boy Scouts in the Empire have won this coveted decoration.

SCOUT CABINET MINISTER
The first former Boy Scout to become a cabinet minister in Great Britain is John Hynd, recently appointed Chancellor of the Duchy of Lancaster. As a youth Mr. Hynd was a member of the 29th Perthshire Troop in Scotland, known as the Seaforth, from the fact they wore the Seaforth kilts.

Continued from Page One.

C. A. Conrad Heads Brentwood Trade Bd.

days of the Board. The amusing stories of the early days of the Victoria Wineries gave many a chuckle to the crowded meeting. Installing Mr. Conrad, J. V. Johnson told of the objectives of the Associated Boards of Trade. "We are ready to help you at all times," he said.

Major Holmes, in installing F. Riley, told of the many attractions the district held. He stated that the Brentwood College, founded 23 years ago, had attracted hundreds of visitors. "This fine education centre," he said, "is fast becoming one of the Island's institutions, and the district will long be remembered by those who have attended the college."

More than 14 new members were accepted by the Board. Reeve Lambrecht, of Saanich, spoke on the water question. The Saanich Council were making efforts to obtain water from the Elk Lake line, he told the gathering. Every effort would be made to relieve the serious situation which exists in Brentwood. The Reeve pointed out that co-operative talks would undoubtedly find a way to make water available.

Major Holmes, who also spoke on the subject of water, told of the various watersheds exploited by the Victoria Council. "The cost of obtaining a supply of water is high," he said. He told of plans, now prepared to tunnel through the rock of a mountain, instead of bringing the water around the side of it in leaky pipes. Much interest was shown in Major Holmes' talk.

During refreshments various suggestions were made by members for future projects. A garbage disposal service was mooted and received the support of many members. Asked to speak on the subject, F. C. E. Ford, of the Sidney Public Council, a resolution, warned against too hasty a choice in selection of a dumping ground. He advocated the support of a garbage disposal service by private contract. In further discussion it was learned that the use of the Victoria Incinerators could be hired at a set price per load.

Constance S. Thomas Weds Vancouver Man

Rev. Frank Hardy officiated at the wedding on Saturday evening, in the United church, of Constance Stella Thomas and Jack Pettie, of Vancouver.

The bride was given in marriage by her father, John Thomas. A sister of the bride, Gladys Thomas, was bridesmaid. Thomas Bull was bestman.

Following the ceremony a reception was held at the home of the bride, Henry Avenue, Sidney. More than 25 guests assembled to offer best wishes to the young couple. Out-of-town guests included Mrs. K. Pettie, mother of the groom, and two of his sisters. After a honeymoon spent on the island, the couple will reside in Vancouver.

Table Tennis Team Visits Mt. View High

Last Friday afternoon North Saanich Table Tennis team visited Mt. View High school and brought home quite a few pointers on how the game should be played. The local boys lost all their matches, 14 in all, while the girls won 7 and lost 7. Scores are as follows with Mt. View players mentioned first:

THE GULF ISLANDS

FULFORD SALT SPRING ISLAND

Mrs. H. Timms of Beaver Point, spent a few days in Victoria last week where she had been visiting her mother, Mrs. G. Fraser.

Mrs. Douglas Newmacker returned home to West Vancouver on Thursday after spending a few days at Fulford Harbour where she has been visiting her mother, Mrs. E. L. Howdle.

Mrs. Hugh McMillan and baby Brian, arrived from West Vancouver on Monday last. They are visiting Mrs. McMillan's mother, Mrs. E. L. Howdle, at Fulford Harbour, for a week or two.

Mrs. E. L. Howdle was hostess on Wednesday afternoon at her home at Fulford Harbour when she entertained a few friends at the tea hour. Among those present were: Mrs. E. H. Collins,

Yes... ready and waiting for stronger hands to take over the heavy tasks which the older folk have carried through the long years of war... Everything is in good shape. Dad has seen to that. The fine heritage created by his own labour and prudence is protected, too, by a SUN LIFE insurance policy which will, should he die, take care of the mortgage and any indebtedness normal to good farming operations... Yes, Dad made a good job of planning for the well-being and security of his family in generations to come.

GALIANO ISLAND

Mrs. A. E. Scoones, who spent the past week in Vancouver, returned home on Saturday. She was accompanied by her daughter, Miss Betty Scoones.

Mrs. I. G. Denroche, of Gossip Island, left on Tuesday of last week for Vancouver where she will visit her husband, Capt. Denroche, who is a patient in the Vancouver General hospital.

J. Robinson has arrived to spend a few weeks at his island home "Benroy."

Mr. and Mrs. A. Gordon have as their guests, Mrs. Gordon's mother, Mrs. Preston, and her sister, Mrs. T. Leith, both of Edmonton, Alta.

D. A. New, who spent the past few days in Vancouver, returned home on Monday.

Peter Lynch, of Vancouver, was recently the house guest of Capt. and Mrs. Fisher.

GANGES SALT SPRING ISLAND

After spending seven months at Ganges with her son-in-law and daughter, Mr. and Mrs. A. B. Elliot, Mrs. Harvey returned to her home at Central Settlement, last Saturday.

Miss Patricia Halpenny, R.N., and Miss Opal Mallow, R.N., both of whom are shortly to be married left on Saturday for their respective homes in Saskatchewan, after several months on the nursing staff of the Lady Minto Gulf Islands hospital.

Mrs. H. J. Sims returned to her home in Victoria last week, after a few days visit to her parents, Mr. and Mrs. A. B. Elliot, Ganges.

Miss Margaret Constable, R.N., Victoria, returned last week to the nursing staff of the Lady Minto Gulf Islands hospital.

Mrs. G. Borradaile returned to Ganges on Saturday after a few days' visit to her son-in-law and daughter, Mr. and Mrs. Ray Morris, Victoria.

Mrs. H. M. E. Evans and Miss Anne Evans, Edmonton, arrived last Friday at Ganges, where they will be guests for two weeks at Harbour House.

Mrs. Desmond Crofton and Miss Sylvia Crofton, Ganges, left on Thursday for Vancouver, where they will spend a few days.

After spending three months at Ganges visiting her grandmother, Mrs. G. Borradaile, Miss Pat Roberts left last week to rejoin her mother in Merritt.

Mrs. W. Jansen returned to Ganges last week after spending some days in Vancouver with her husband, who is taking a forestry course for Rangers, at Green Timbers.

Mr. and Mrs. H. M. Cooley returned on Monday to Victoria after spending some days with Mrs. Cooley's parents, Mr. and Mrs. J. Rogers, Ganges.

Mr. and Mrs. Jackson arrived from Vancouver on Saturday to start building a home on their property at North Salt Spring, formerly purchased from A. Hedger.

Miss Nora Somerville returned to Ganges on Saturday after a few days' visit to her sister in Vancouver.

MAYNE ISLAND

Miss Aileen Shannon returned from Vancouver on Thursday.

Mrs. Aitken arrived on Saturday from Vancouver to visit her son and daughter-in-law, Mr. and Mrs. Robert Aitken.

Mr. and Mrs. Round and their daughter are the guests of Mr. and Mrs. Steele this week.

Mr. Palao was in Vancouver last week and returned on Saturday.

Four Births At Lady Minto Hospital During February

Report for the Lady Minto Gulf Islands hospital, Ganges, for February was as follows: No. of patients beginning of month, 9; patients at end of month, 7; patients admitted in month, 24; Indian T.B. days, 0; total babies days, 37; births, 4; deaths, 1; total hospital days, 235.

Donations acknowledged by the staff for February included: G. St. Denis, sand; Capt. and Mrs. V. C. Best, box apples; Mrs. G. Nelson, Brussels sprouts and 1-lb. cotton wool; Mrs. A. B. Price, eggs; Mrs. Warren, Hastings, apples, books, flowers; D. Pike, cauliflower; J. J. Akerman, magazines; Mrs. E. Lockwood, jam; a group of Ganges ladies, a wool bed throw.

The Canadian Red Cross Society raised \$95,000,000 in the war just closed. During those six years it packed 16,000,000 food parcels for prisoners of war; gave millions in money and goods to our Allies; provided 45,000,000 articles of supplies and comforts for overseas; shipped 2,000,000 lbs. of jam and honey to Great Britain; collected more than 2,300,000 donations of blood through Blood Donor Service while Junior Red Cross members raised half a million dollars for children of war-torn lands.

P.T.A. AT GANGES HOLD CARD PARTY

Under the general convenership of Mrs. George St. Denis the Salt Spring Island branch of the Parent-Teacher Association held a bridge and whist drive last Friday evening in the Mahon Hall, Ganges.

A. J. Eaton and Gordon Parsons acted as masters of ceremony for the evening, 14 tables of bridge and six of whist were in play and among the hostesses were: Mrs. D. K. Crofton, Mrs. Alan Cartwright, Mrs. S. Donkersley, Mrs. J. Graham, Mrs. M. Gardner, Mrs. N. Howland, Mrs. E. Lockwood, Mrs. V. Laing, Mrs. Marquis, Mrs. Gavin C. Moutat, Mrs. Laurie Moutat, Mrs. H. I. Petersen, Mrs. W. M. Palmer, Mrs. W. L. Rogers, Mrs. Archie Rogers, Mrs. G. St. Denis, Mrs. A. Malcolm Smith, Mrs. Graham Shove, Mrs. George West, Mrs. Bishop Wilson, and Mrs. Stanley Wagg.

The prizes donated by Mrs. G. St. Denis and Mrs. G. West were won for bridge by Mr. and Mrs. Stanley Wagg; for whist, by Miss Gladys Moutat and Norman Moutat. Assisting the convener with supper were Mrs. W. Jameski, Mrs. W. L. Rogers and Mrs. Cyril Wagg.

The sum of \$28 was realized for P.T.A. funds.

There are 2,541 branches of the Canadian Red Cross Society with a membership of nearly two million.

Tours Texas

Home again in Canada is CBC executive Jean Beaudet who recently completed a recital tour of the leading cities of Texas as piano accompanist with Raoul Jobin, Canadian-born star of the Metropolitan Opera.

Ganges I.O.D.E. Show S.O.D.F.s

The Ganges chapter, I.O.D.E., met last Friday afternoon at Ganges Inn, with the regent, Mrs. V. C. Best, in the chair.

Correspondence included three letters of thanks for gifts and one from the Provincial chapter regarding the drive opened Feb. 15 for the I.O.D.E. War Memorial, by which the order hopes to raise \$500,000 during the year, to be used for bursaries and higher education for children of men and women who died as the result of war.

The treasurer's report showed \$109.34 in the general fund and \$108.36 in post war fund, in these amounts was included a donation of \$50 received from a member towards the War Memorial, the chapter voting, from its funds, another \$50 to make the sum up to \$100.

The post war convener reported 17 articles received during February, amongst which was a specially beautiful box of knitted baby things sent in by Mrs. Littleday, of Mayne Island.

The ex-service personnel convener stated that eight letters had been written during the month.

The chapter voted \$6.75 to pay the annual head tax for Girl Guides. Mrs. Harvey undertook to continue with the collection of tin foil. It was announced that by the recent children's fancy dress party, a net profit of \$20 was made.

Arrangements were made for the holding of telephone bridge on Wednesday, March 27, to raise funds towards the War Memorial.

Tea hostesses were Mrs. J. C. Kingsbury, Mrs. Cecil Springfield and Miss Betty Kingsbury.

Sales of Property Continue Active At Salt Spring Island

Messrs. Mac and Arthur Young, Vancouver, have purchased from W. A. McAfee his blacksmith's shop and adjoining property at Ganges. The new owners intend to enlarge the premises and carry on the blacksmith business in conjunction with a garage.

Mr. and Mrs. J. Croft, Cloverdale, have purchased Mr. and Mrs. J. C. Kingsbury's house at Ganges. L. Snow, Vancouver, has purchased from Charles Peck, five acres on Rainbow Road, Ganges, where he intends building in the near future.

Joseph Ford, Vancouver, has purchased from R. H. Cousins, five acres of his property on Rainbow Road, Ganges.

Mr. and Mrs. J. C. Kingsbury have purchased the house and property on Herford Avenue, Ganges, belonging to Mr. and Mrs. C. W. Baker and temporarily occupied by Mrs. V. Laing.

Salt Spring W.A. Hold Tea, Make \$11

The Salt Spring Island branch of the Women's Auxiliary held a tea recently at the home of Mrs. F. Stacey, Ganges, nearly 50 members and friends attending and \$11 was realized towards the funds of the organization.

Mrs. Stacey was general convener, the program for the afternoon being in charge of Mrs. F. Baker, assisted by Mrs. W. M. Palmer.

In a musical contest, the prize winners were Mrs. V. C. Best, Mrs. W. M. Palmer, Mrs. H. A. Robinson, Mrs. Stanley Wagg and Miss Helen Deane.

Vocal solos were rendered by Mrs. W. Norton, Mrs. H. A. Robinson and Ven. G. H. Holmes, Mrs. Baker and Mrs. Palmer accompanied and supplied music for the contest.

The hostess was assisted in serving tea by Mrs. E. Adams, Mrs. S. Bannister, Mrs. H. C. Carter and Mrs. F. Sharpe.

Snowdrops were used for the decoration of the tea table and the same flowers and cottonseed adorned the room.

GALIANO ACCIDENT VICTIM TO UNDERGO OPERATION

It has been learned that James F. Baine, who was severely crushed two weeks ago at Galiano Island, has undergone an operation for the removal of his left leg from just below the knee.

The Red Cross Corps has nearly 1,600 active and reserve members in British Columbia and during 1945 these corps girls gave 127,982 hours of voluntary service. Fifty B.C. Corps members

LESS STRIKES IN JANUARY

Time lost due to strikes and lockouts in Canada during January this year was only 8 per cent of the loss during the previous month—December, 1945, it was announced today by Hon. Humphrey Mitchell, minister of labor.

The sharp decrease in time loss in January is accounted for in large part by the fact that the strike of motor plant workers at Windsor, Ont., had continued well into December.

In January, 1946, the time loss was 20,593 man-days, arising out of 12 strikes involving 2,935 workers.

The 13 strikes during the previous month (December) involved 19,619 workers, and a time loss of 261,619 man-days.

Compared to the same month a year before, time loss in January showed a drop from 32,142 man-days.

Basing the calculation on the number of non-agricultural wage and salary workers in Canada, the figures for January, 1946, show an estimated time loss of 0.28

man-days of available working time, as compared with 3.61 for December, 1945, and 0.42 for January, 1945. In other words, this means that in January just over one-quarter of a man-working-day for every 1,000 man-days possible was lost due to strikes.

"While the statistics for strikes for February will not be available for some days," the Labor Minister said, "Canada continued during last month to show the favorable record with which 1946 started off in January."

"In issuing figures that show such a favorable situation in regard to industrial relations in Canada, I think it is appropriate to express genuine appreciation to the manner in which both unions and employers have been carrying on their relations in this country. The numerous cases of peaceable negotiations between management and labor—carried on with the assistance of Labor Department officials as required—do not always make exciting news, but the fact is that in almost all cases recently negotiations have been carried through to a satisfactory completion without work stoppages," the Labor Minister added.

National Employment Service benefits THE WHOLE community

Regular employment and pay envelopes make for carefree families—for prosperous communities—for "good times" for employer and employee alike. The National Employment Service, with offices in more than 200 cities and towns across Canada, serves the needs of both employers and employees—and the local N. E. S. office takes its place in importance to the community among the time honoured community institutions—the Post Office, the Court House, the City Hall.....

Without National Employment Service, the worker is left to his own initiative to find a job to support himself and his family. The employer may be unable to reach workers he requires. National Employment Service is the clearing house through which employer and employee are brought together, so that both may have their free choice of the entire employment market.

- National Employment Service has 5 main functions:**
- 1—Organization of the whole employment market, and bringing together employers and employees;
 - 2—Collection of information on employment problems for the use of Government, Management and Labour;
 - 3—Administration of Reinstatement in Civil Employment Act;
 - 4—Dealing with Unemployment Insurance Benefits;
 - 5—Dealing with Out-of-Work Benefits for Ex-Service Personnel.

Make full use of the Local Office of National Employment Service. It is there to serve your needs, and those of the entire Community.

Prepared Medicines Old And New

By L. P. TEEVENS

The healing methods of thousands of years ago began in mystery and superstition. Progress was hampered by ignorance and quackery. Animals were often worshipped by the ancient people, and almost every conceivable animal known was used in medicine with doubtful, if any, beneficial effect.

The Egyptians treated childhood diseases by administering a skinned mouse. Mummies of children are found today with the remains of a mouse still in the stomach. The same "remedy" was given centuries later as a preventive against toothache. Primitive man at the organ of animals because of a believed mystic virtue. Today animal substances are not used on the basis of mysticism but upon knowledge acquired through scientific investigation.

The same may be said for the remedies of vegetable origin. Early man believed that trees and

plants were the abode of spirits, and that eating the plant and drinking its juice brought the virtue of the spirits to the human flesh. Almost every plant on the earth has been used in the treatment of disease. Most have no virtue, but the early type of medical practice made no discrimination in such matters.

Early man found that the spirits in some vegetable substances were really harmful, and even deadly to the human body. The medicine man dealt with them in his practice of black magic, and in the middle ages the compounding of poisons was regarded as a fine art, useful to scheming nobility to rid themselves of those who stood in the way of their ambitions.

COATED PILLS

Pills were coated with gold and silver in the 11th century. Golden pills, amber pills and Angelic pills were names used 300 years

ago. Later, in the 19th century, sugar coated pills made their appearance.

The use of mineral substances in medicine came later, and is widely employed today in analgesics, laxatives and tonics.

The believed influence of the moon on bodily functions is shown in our word "lunatic." The healing properties of gems, healing wells and springs, the magic of stones, and the evil eye were the kind of matters that had their place in medical affairs before science came in to give us a rational basis for modern medicine.

Before the fall of Rome to the barbarians, medicine had deteriorated. Vendors of quick remedies had their shops on the streets. The calling of the physician had passed into the hands of professional poisoners and courtisans who peddled drugs. Medicine ceased to be a science.

In bygone days the medicines used by physicians were of a simple nature. As late as the 19th century there were no complicated chemical compounds, or even more complicated biological preparations indispensable to the 20th century.

Proprietary medicines, as they are known today—probably more correctly described as prepared packaged medicines—are extensively used. Millions of dollars are spent annually on the purchase of prepared medicines of domestic and foreign manufacture, and millions are invested in Canada in laboratory and pharmaceutical industries, where large numbers are employed, including highly qualified and trained technicians. The majority of preparations sold as packaged medicines in this country are manufactured under such supervision.

Control is exercised over the manufacture, labelling and advertising of proprietary medicines through the operation of the Proprietary or Patent Medicine Act. This act has been in force for a number of years, and its restrictive measures have given a considerable degree of protection to

It is late summer, 1943. At Montreal and Quebec, 40 Canadian National Express cars are being hurriedly, yet carefully loaded with thousands of tons of shells, land grenades and—odd as it may seem—rubber footwear. The loading of the munitions at the various plants is being done under the protection of armed guards. On each of the four special trains needed, only one person, a swift, armed local office employee of the C.N. Express, knows what the supplies are for and where they are going.

Until now it was a secret. More than 3,000 miles away, the Japanese were in the Aleutians. Troops were manning strategic de-

fence posts against the threat. Invasion by American and Canadian forces was decided. D-Day was set. But special equipment and munitions had to be obtained quickly for the particular type of warfare to be waged. The supplies were sent to the invasion force on the fastest C.N. Express schedule to the most distant point on the System's Pacific Coast line.

Thousands of shell casings, one of hundreds of similar shipments handled by the C.N. Express during the war, are shown being loaded in a car on their way to a shell-filling munitions plant. When the shells were filled with explosives, only a small number was placed in a car, packed in protective cases and specially loaded.

VETS.' CREDITS PASS \$2 MILLION

Re-establishment credit payments to veterans in B.C. passed the two million dollar mark in February, according to figures released today by the Department of Veterans' Affairs.

A total of \$321,544 was paid to 1,357 ex-servicemen and women during the month, bringing total value of applications paid to date in the province to \$2,142,047. Nearly 14,000 applications for use of the credit have been received since DVA began operation in B.C.

Reflecting similar percentages across the Dominion, a breakdown of the B.C. figure shows that 35 percent has been spent on the acquisition of new homes, while 28 per cent has gone for the purchase of furniture; 14 per cent has been used for the repair or modernization of houses already owned by veterans and one per cent has helped pay off home mortgages.

Working capital for businesses claimed 10 per cent of the credit and the purchase of tools or equipment 9 percent. Only two percent was used for the actual purchase of businesses and one

RUSSIAN STORES OF FERTILIZERS

For many years Germany was the sole source of fertilized potash, and not until France regained Alsace in 1918 was the monopoly broken. Since then the United States has become independent of foreign potash supplies through the discovery and development of vast deposits in New Mexico and in the concentrated brines of Searles Lake in California. Potash is mined in Spain and extracted in ever-increasing quantities from the depths of the Dead Sea in Palestine. Russia has been mining and exporting potash for some time, and now it is reported that she has larger reserves of potash than are in Germany.

Germany has always had cause to deplore the lack of phosphate resources within her borders but succeeded in helping herself liberally from the stores in North Africa during the temporary occupation of that territory. The extensive deposits of phosphate in Tunisia and Morocco are of comparatively recent exploitation. The U.S. fields in Florida, Tennessee and Montana, are best known, the Florida deposits being of relatively greater importance. There is phosphate on the island of Nauru in the South Pacific, whence Australia and New Zealand draw their supplies, the flow of which was interrupted when the Germans shelled the installations in the first world war and again when the Japs destroyed them totally in the second. It has been reported recently that the U.S.S.R. possesses reserves of phosphate greater than have been found in any other country.

percent to pay for veterans' insurance.

The most popular single purpose for which the credit may be used in the purchase of furniture, 6,075 applications having been received to date.

Six complete 25-bed emergency hospitals are stored in British Columbia by the Disaster Relief committee of the Red Cross. Located at strategic points, in emergency these units can be shipped by air.

SAVORY STEW

A good stew is a culinary triumph. They may be made from a wide choice of meats, and variety may be achieved by combining different meats. Whatever the ingredients or method, all stews should be good.

If the meat is dredged with flour, it develops flavor, thickens the gravy and gives it a more attractive color.

Variety may also be obtained by the use of different vegetables which vary in flavor, color and texture. Onion always adds interest in flavor but use only one other, strong-flavored vegetable such as turnip or cabbage. Add the vegetables just in time to cook tender. Many a stew has been spoiled by overcooking the vegetables. Additional salt will be required when the vegetables are added.

Stews afford the ingenious homemaker a wide scope for her imagination. Try a cup of sour cream in a veal stew, or a little curry powder in a lamb stew. Marjoram and thyme or a little bay leaf are good seasonings. Experiment cautiously and taste carefully. The flavor should be subtle.

Attractiveness in serving is important to the success of any stew. If the meat and vegetables are arranged on a platter, and the gravy served from a separate dish, it may have more eye appeal. Omit potatoes from the stew when dumplings, baking powder biscuits or noodles are served as accompaniments.

TO MAKE A GOOD STEW:

Cut meat in uniform small pieces. Season well and dredge with flour, if desired.

Brown meat in hot fat. Add only enough liquid to cover. Cover closely and cook slowly at simmering temperature until tender—about 1½ to 2 hours. Never allow a stew to boil hard. Add the vegetables just in time to cook tender—about ½ hour before serving.

Remove meat and vegetables before thickening the liquid for gravy.

SPANISH STEW

1½ lbs. veal (breast, shank, neck or shoulder)
2 onions
1 cup diced celery
1 cup uncooked spaghetti (broken into pieces)
2 cups water
2 cups tomato juice
Seasonings

Wipe veal. Remove fat. Cut veal into 1½-inch cubes. Roll meat in flour, brown meat and onion in fat, taken from meat. Add water. Bring to boiling point and simmer ½ hour. Add remaining ingredients, season and simmer 1 hour longer. Thicken with a paste made of flour and water. Six servings.

B.C. AGRICULTURE

Great in War, Must Be Greater Still in Peace.

LIVESTOCK PRODUCTION

QUALITY production and conservation are two watchwords in the livestock production program of the province. During the war years, the increase in numbers of livestock on farms was comparatively heavy.

British Columbia compares with Canada's livestock population increases as follows:

	1940-44 British Columbia	1940-44 Canada
Milk Cows.....	6% increase	8% increase
Other Cattle.....	42% increase	35% increase
Swine	25% increase	29% increase

One of the several important steps undertaken in this Province has been the warble fly control program.

This is the oldest organized program in the Dominion of Canada, and probably in America, commencing as trials in 1930-31 and 32 and as an organized area plan in 1933.

Many areas are now ready for accreditation, only requiring field checks to be made.

The program covers practically every district in the province.

It commenced with hand application amongst the smaller herds and is now well established in the range country where power machines, purchased by the stockmen themselves, are being used.

Yearly contribution by the Agricultural Department to this program amounts to approximately \$5,000.00. Losses to the industry in the beginning would amount to over one-half a million dollars each year. Even during difficult times, with a labor shortage, over 125,000 cattle are treated each year.

Any organized body of farmers requiring assistance should immediately get in touch with their local district agriculturist.

This was the freak fall of snow which ushered in the opening of the Mill Bay-Brentwood Ferry. Just six weeks ago. Photograph shows the Mill Bay approach to the ferry, then unfinished.

Mrs. Downey, Pioneer Resident of Deep Cove, Buried at Holy Trinity

Mrs. Lucy Downey, pioneer resident of Deep Cove, who died on Saturday, March 2, was buried at Holy Trinity churchyard on Tuesday.

Widow of David Allan Downey, who predeceased her some years ago, Mrs. Downey was loved and respected throughout the length and breadth of the Peninsula, she has no relatives.

Canon H. H. Creal officiated at the church ceremony; pallbearers were: S. McClure, I. Dallain, J. Munroe, P. F. Mumford, T. Sauvery and D. Sparling.

protein, which fell to 7.07% at the medium stage and to only 4.65% when mature. The phosphorus content dropped correspondingly. Loss in quality far outweighs the gain in bulk when the hay crop is allowed to mature and makes more urgent the need for addition to the winter feed of a well-balanced mineral supplement containing calcium, phosphorus and the essential minor elements.

ASSUMES NEW BANK DUTIES

Otho Rupert Sharp, assistant general manager of the Bank of Montreal for the Prairie Provinces, British Columbia and the Yukon, with headquarters in Montreal, will retire on pension shortly after 46 years' service with the bank, and his duties will

F. G. BELCHER

be assumed by the bank's former superintendent for Manitoba and Saskatchewan, Frederick Gordon Belcher, at present assistant general manager for the Quebec, Maritimes and Newfoundland division.

EDWARD POPE

Edward Pope, who was recently appointed an assistant general manager upon his return from England, where he had been in charge of the bank's main office in London, will succeed Mr. Belcher.

Ripe Grass Poor Feed

While the yield and nutritive value of herbage can be increased by fertilizing, a great part of the advantage may be lost if the hay crop be allowed to become too mature before cutting. This has been proved many times over, and the recent bulletin No. 669 of the Texas Agricultural Experimental Station emphasizes the point. Reference is made to the evidence of malnutrition diseases in animals fed on forage deficient in protein, phosphorus and calcium and to the link between protein and phosphorus.

Nearly 2,000 samples of grasses taken at young, medium and mature stages of growth, were analyzed. Western wheat grass when cut young contained 14.67% of

U.B.C. RECEIVES \$25,000 BEQUEST

The sum of \$25,000 has been bequeathed to the University of British Columbia under the terms of the will of the late Thomas Holmes Johnson, of Victoria, it was announced today by the president, Dr. N. A. M. MacKenzie.

Under the provisions of the will this sum is to be set aside, as an endowment fund for the provision of bursaries for deserving students.

Mr. Johnson passed away on July 20, 1945. Before settling in Victoria in 1945, he was a resident for 22 years of Prince Rupert.

He is survived by his widow, Mrs. Edith A. Johnson, of Victoria.

I.O.D.E. Welcome New Members

Members of H.M.S. Endeavor chapter, I.O.D.E., welcomed the following as new members at their regular meeting held on Tuesday evening at the home of Miss Dorothy Hall: Miss Shirley Kerr, Miss Doreen Mitchell, Mrs. D. Sluggett and Miss Joan Butler.

Proceeds from the Valentine dance, amounting to \$50 were donated to the Queen Alexander Salarium fund.

Following the meeting refreshments were served by the hostess, Miss Dorothy Hall.

NO BEE SUBSIDY

The subsidy of 50c per pound paid on imported package bees from March 1 to June 15 in 1944 and 1945 will not be paid on 1946 imports. To offset the consequent increase in 1946 production costs, states the Wartime Prices and Trade Board, a revis-

ion is to be allowed in the ceiling price of the 1946 honey crop, but the exact amount of this price rise has not yet been determined.

POME ? ?

A dear little place,
Nestled down,
Hiding its face,
Near the water.
The worn barge boards,
Warped and seamed,
The wild tide's inroads
Its yard had reamed
As though neglect
Had done its part
And all but wrecked
Once pretty yard.

The dear old dame,
Who long had called
It home, and came
To welcome at the gate
Friend or stranger
Just the same
For tea you're never late.

This place I did
Intend to paint
With Bapeco pure,
But now the ivy
Looks so quaint,
I'm not so sure.
We'll let it go
Another week,
The wind to blow,
The lum to creak,
And look for
Something else.
